

To Whom It May Concern,

As a faculty member at the University of Jeddah and an Assistant Professor in the Software Engineering Department, it is a great pleasure to provide this recommendation in support of Ms. Sara Abdulrahman Yahya Bajarsh for her application to your prestigious graduate program.

I have had the opportunity to closely observe Sara's academic progression, research capabilities, and technical development through two major milestones in her undergraduate journey: the advanced research course, "Advanced Topics in Software Engineering," and her comprehensive Final Graduation Project. Throughout these experiences, she has consistently demonstrated a rare combination of rigorous analytical capabilities and advanced technical execution.

Throughout our academic and research collaborations, Sara has proven to possess several key strengths that make her an ideal candidate for your program:

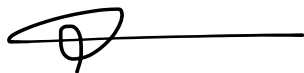

- **Advanced Research & Analytical Skills:** In the "Advanced Topics in Software Engineering" course, Sara excelled in Research Design and Methodology. She demonstrated a strong command over both Quantitative and Qualitative Research Methods, meticulously handling survey design and data collection, and executing precise statistical and thematic data analysis. Her work is further distinguished by exceptional academic writing and thorough scientific documentation.
- **System Engineering & Requirements Analysis:** During her Graduation Project, Sara showcased a highly structured approach to engineering complex systems, managing the complete lifecycle of rigorous requirements analysis and translating those needs into robust, scalable system designs.
- **AI & Technical Proficiency:** Sara exhibits high-level technical skills in software development, particularly in cutting-edge domains. She successfully contributed to the development of an AI solution, leveraging Natural Language Processing (NLP) techniques to address complex, intelligent system requirements.
- **Professionalism & Drive:** Sara is highly disciplined, analytically driven, and approaches problem-solving with the mindset of a dedicated software engineer. She possesses excellent communication skills and a strong commitment to academic excellence and integrity.

I am confident that Sara's solid foundation in software engineering, combined with her hands-on expertise in artificial intelligence, advanced data analysis, and empirical research, will allow her to excel in your graduate program. She has the academic rigor and the professional drive to contribute significantly to the field.

I recommend her for admission without any reservations. Please feel free to contact me if you require further information.

Best Regards,

Elham Al Qahtani
